EXPERIENCE

Resolvo Development
Founder/CEO - Wide range of programming languages/frameworks.
- Managed a Development business which included managing things like finances, clients, legal documents & more.
- Effectively planned plans with clients to ensure work completed was up to their standards.
- Developed a multitude of client projects within timescales discussed with clients.

PlugAI Affiliate Dashboard
Freelance - Golang, Typescript, React, Next.JS, TikTok API.
- Developed an affiliate dashboard to allow users to request payouts.
- Constructed an admin dashboard to view requested payouts by users.
- Created an API to scrape TikTok accounts for views on videos related to the PlugAI app and calculate how much the user is owed for this.
- Created secure authentication to allow users to link accounts, request payouts etc.

Animiru
Freelance - Javascript, React, 3rd Party API's.
- Worked alongside a team to create a website to allow users to watch anime.
- Helped implement frontend functionality to allow users to review anime, keep track of previously watched anime etc.
- Implemented backend logic to help support some of these features.

PERSONAL PROJECTS

Solvio - AI Homework Solver
Python, Golang, Typescript, React, React Native, Next.JS.
- Developed React-Native mobile app to allow users to upload photos and get answers..
- Created a website to allow previously answered questions to be browsed.
- Utilised GoLang's performance to build a scalable API to manage requests.

Devbio - Developer Profile Site

Golang, Typescript, NextJS, React.

- Github Link: https://github.com/loganbriggs08/devbio
- Developed a full stack website to allow users to create & view profiles on a clean UI.
- Used Golang to create a preformant API for requests from the website/user.
- Ensured the database was easy for other developers to read and
